SANJEEVANI INSTITUTE OF ORTHOPAEDICS & JOINT REPLACEMENT — DISCHARGE SUMMARY
21, Hill Road, Dharampeth, Nagpur 440010 · Ph: 0712-2XX-XXXX · HFR Regn. No. HFR/FICT/2107

……
……

Name / Age / Sex Kavita Joshi / 52 yrs / Female
IP No. SIO/IP/2026/11882
Admission 05-10-2026, 9:20 AM (planned, elective)
Discharge 12-10-2026, 11:00 AM
Room Single AC, Ward 3, Room 312 (¹9,500/day)
Attending physician Dr. Ajay M. Deshmukh, MS (Ortho), Fellowship in Joint Replacement
Anaesthetist Dr. Swati Kulkarni, MD (Anaesthesia)

Diagnosis: Severe primary osteoarthritis of the right knee (Kellgren–Lawrence Grade IV), ICD-10 M17.1 — admitted for total knee replacement (right).

History: Progressive right knee pain and stiffness × 6 years; night pain × 8 months; failed conservative management (physiotherapy, analgesics, intra-articular steroid injection ×2 — last 14-03-2026). Ambulatory but severely limited walking distance (<200 m with support). No trauma. No diabetes / hypertension. Hypothyroid on Levothyroxine 50 mcg OD (well controlled).

Pre-op work-up (04–05-10-2026): Standing AP/lateral/skyline X-ray right knee — KL grade IV OA, tricompartmental, varus 9°. CBC, RFT, RBS, viral markers, TSH, ECG, 2D Echo — fitness certified (Class II ASA) by Dr. S. N. Bawankar, MD (Medicine).

Course: Admitted 05-10-2026. Total knee replacement (right) on 06-10-2026 under combined spinal-epidural anaesthesia (9:30 AM–12:15 PM, OT-1). Implant: Sanjivani Joint Systems — femoral component + tibial tray + polyethylene insert + patellar resurfacing (sticker enclosed). Intra-op uneventful; tourniquet released; hemostasis satisfactory. Post-op X-ray: satisfactory alignment, cemented components. Shifted to recovery, then room. Epidural catheter removed 07-10 (24 hrs). DVT prophylaxis (Enoxaparin 40 mg SC OD × 7 days) + antibiotics.

Post-op course: Ambulant with walker POD-1; flexion 70° POD-4; stair-climbing practice POD-6. Wound healthy, dry. Post-op Hb 10.9 g/dL (pre-op 12.1).

Discharge condition: Stable; ambulant with walker, knee flexion 80°.

Advice:
1. Tab. Amoxiclav 625 mg 1-0-1 × 7 days; Inj. Enoxaparin 40 mg SC OD × 3 more days (dispensed); Tab. Dolo 650 mg SOS; Tab. Calcium + Vit D3 OD × 3 months.
2. Physiotherapy: quadriceps setting, CPM as tolerated — home physiotherapy × 6 weeks.
3. Suture removal 14-10-2026; OPD review at 2/6/12 weeks with X-rays.
4. Walker 4 weeks !’ single stick 6 weeks !’ full weight-bearing as tolerated.
5. Continue Levothyroxine 50 mcg OD.

Dr. Ajay M. Deshmukh, MS (Ortho) · Reg. MMC/FICT/67021
Date: 12-10-2026 · Hospital seal

Note for claim file
Claim form Part A completed by patient at admission desk on 05-10-2026.
Part B (hospital certification) is pending — desk schedule; to be collected by claimant on next OPD visit (14-10-2026) and submitted to insurer thereafter.
